**SHAVLIK TECHNOLOGIES FORMS PARTNERSHIP WITH MCAFEE TO
PROVIDE PATCH MANAGEMENT TECHNOLOGY FOR NETWORK
ACCESS CONTROL SOLUTION**

Shavlik Remediation Capabilities Key to Deliver Complete Network Access Control Solution

San Jose, Calif. (February 14, 2006) — Shavlik Technologies, LLC, a leading global provider of enterprise security software solutions, announced that it has formed a partnership with McAfee Inc. to provide its industry-leading patch management technology as part of McAfee's Network Access Control (NAC) solution. McAfee NAC, powered by McAfee Policy Enforcer, gives medium to large businesses anywhere, anytime access to corporate networks for their employees, guests and contractors, while protecting valuable assets from the risk of endpoint malware and misconfiguration. Remediation component of McAfee's NAC solution features Shavlik HFNetChkPro's patch management to ensure security updates are quickly and easily deployed across large networks.

McAfee, the global leader in Intrusion Prevention and security Risk Management, is the latest company to leverage Shavlik technology. "The Shavlik team is excited to work with McAfee to provide this important security solution. McAfee Policy Enforcer delivers an innovative Network Access Control solution that, when working with our market-leading patch products, provides customers with state of the art security patch management. This solution provides a high degree of usability, enabling customers to easily manage enterprise security, helping them meet unknown risks and manage the needs of today's highly complex network," said Mark Shavlik, president and CEO of Shavlik Technologies.

McAfee delivers flexible remediation choices as part of its NAC solution covering a) security application updates; b) vulnerability shielding using McAfee host IPS for pre-patch protection; as well as c) patch management capabilities. "Patch management is an important component of McAfee NAC solution and we chose to work with Shavlik as one of the patch management vendors due to their leadership position in this space. Shavlik's assessment and remediation capabilities are best of breed and we're excited to be able to feature Shavlik HFNetChkPro in our solution," said Vincent Rossi, senior vice president of product marketing and management.

The McAfee NAC solution will be demonstrated at the RSA Conference in San Jose, CA February 13-16, 2006. Demonstrations will be available at Shavlik booth #423 and McAfee booth #1307 in the conference exhibit hall.
